

#27 By Young?
PLUNKETT

① Height = 8

② MN = ?

③ Similar Triangles
 $\triangle SNR \cong \triangle SNQ$
 $\cong \triangle RNQ$

④ QR = 4 B/C of Similar Triangle

OVERALL STRATEGY
 was find SQ then
 subtract SQ & NQ.

⑤ Find SQ.

$$4^2 + 6^2 = SQ^2$$

$$52 = SQ^2$$

$$SQ = \sqrt{52}$$

⑥ PS = 4 B/C half of height

$\triangle BPS =$ right triangle

⑦ Found all similar triangles $\triangle SPM$ and $\triangle NRQ$.

Find SM = NQ then subtract from SQ.

$$\frac{\sqrt{52}}{4} = \frac{4}{?}$$

$$? = \frac{16}{\sqrt{52}}$$

$$? = \frac{4\sqrt{52}}{13}$$

$$\therefore MN = \sqrt{52} - \frac{4\sqrt{52}}{13} - \frac{4\sqrt{52}}{13}$$

$$= \frac{13\sqrt{52}}{13} - \frac{8\sqrt{52}}{13} = \frac{5\sqrt{52}}{13} = \frac{5\sqrt{4 \times 13}}{13}$$

$$= \frac{13\sqrt{2}}{13} - \frac{8\sqrt{2}}{13} = \frac{5\sqrt{2}}{13} = \frac{5\sqrt{4} \times \sqrt{2}}{13}$$

$$= \frac{10}{\sqrt{13}}$$

#28. Find \overline{AB} .

① Find \overline{AD} (Pythagorean)

$$AD^2 = 21^2 + 72^2$$

$$\boxed{AD = 75}$$

② Find height of \overline{FQ} .

$$60 \times 45 = 75 \times h_1$$

$$\frac{60 \times 45}{75} = h_1$$

③ Find \overline{FC}

$$FC^2 = 75^2 - 45^2$$

$$\underline{FC = 60}$$

$$\boxed{36 = h_1}$$

④ Find \overline{FW}
 $\underline{FW = 48}$

⑤ Use similar Triangles

$$\frac{72}{21} = \frac{48}{h_2}$$

$$h_2 = \frac{48 \times 21}{72}$$

$$h_2 = 14$$

① Total Height =

$$= 36 + 14 = \underline{\underline{50}}$$
